"The Pace That Thrills"

CLARESHOLM LOCAL NEWS

Mrs. J. A. Tench returned on Wednesday from her visit at Vancouver.

Dr. R. M. Riggs, of Calgary, was the guest of Geo. Simpsons over the week end.

Don't forget the Curling Club dance, 1, 0, 0, 0, F. Hall, on Friday night, December 18.

Photos make very acceptable Christmas gifts. Call at the Clareholm Studio and leave your order.

The ladies of St. John's Guild wish to thank all those who donated so generously to their annual sale.

W. S. Sanderson will hold their dance on Friday, January 8, and promise that it will be even better than before.

J. D. S. Barrett, of the Staveley Advertiser, spent the week end in town and was a fraternal caller at The Review-Advertiser office.

On Saturday, December 12, A. E. Rimmens will hold a pickup sale at the Vanhorn livery barn, Clareholm. A lot of good stuff listed.

The phenomenally mild weather has continued throughout the past week with, however two or three days of high chinook winds and dust.

J. S. McAlpine has been away this week on a business trip to Crow's Nest Pass towns. He went by motor and Mrs. McAlpine accompanied him.

Church of the Nazarene, Christmas program, Greenbank school, December 23, 2:30 p.m. Clareholm church, December 24, 7:15 p.m. Welcome all.

Mrs. Joseph Rodgers, mother of W. B. Rodgers of Graman, and sister-in-law of Mrs. N. Holmes of Clareholm, died at her home at Tofteld on Tuesday the 8th.

R. V. Price, representing the McEldon-Buchanan Co., will give a motor car lecture at Qually & Yokum's Garage on Wednesday, December 16, at 3 p.m. and 8 p.m. All interested will be welcome.

"The Snob," will be the attraction at the Rex theater on Friday and Saturday nights this week. This picture is adapted from the novel by Helen R. Martin. "The Pace That Thrills" will be the attraction on Monday and Tuesday nights.

Miss Jean Gauld of Calgary was in Clareholm on Wednesday and made partial arrangements for both children's and adult classes in dancing which will start after New Year's. Miss Gauld spent the afternoon at the home of Mrs. J. K. Watt where she met a number of ladies who gave her the greatest encouragement.

Hoot Gibson's greatest picture, "The Calgary Stampede," is coming to the Rex theater on Friday and Saturday, December 18-19. This was the dates of the booking of Zane Grey's "The Thundering Herd," but Manager Edlums had the opportunity to get the big Hoot Gibson picture for these two nights, and it would be a long time before there would be another opportunity to get it, so he succeeded in arranging a date in January for the Zane Grey picture, and secured "The Calgary Stampede" for December 18-19.

Calgary Stampede Film Is Hoot Gibson's Best

Rapid action, beautiful scenes, and a story that holds the spectators enthralled is the feature common to the Rex theater, Clareholm, on December 18 and 19, where Hoot Gibson is shining particularly bright in his latest starring vehicle, "The Calgary Stampede," a Universal-Jewel.

The picture is one which defies criticism and at the same time calls for the free play of superlatives. This is probably the "most-est" picture of the West that has ever been filmed.

Thrills, and beautiful scenes—the two requisites of the successful picture of the West—are present in abundance in this picture. It is all her glory, and is better presented to the screen than through the scenes of this drama of the West which

was actually filmed in the Canadian location.

All her beauty has been captured. And her most famous associate of the West has furnished atmospheric scenes for this impressive picture. "The Calgary Stampede" is the story about a young man wrongly accused of a crime. Yet to him freedom is more dear than imprisonment and a trial with possible conviction so he disappears with the Mounted Police on his trail. A cow-puncher, he turns to a ranch where he gets a small job. Action and thrills pile up until the Calgary Stampede opens its week of festivity.

Even greater suspense is created where much of the plot is unfolded amid the scenes of carnival gaiety.

Herbert Blache, who directed the picture, deserves credit for not allowing interest in the movements of the players to decrease while at the same time introducing much matter of an atmospheric type. Many directors would have completely forgotten their story with such exquisite play as the Calgary Stampede with which to mold the interim scenes of their picture.

Hoot Gibson has an excellent cast supporting him.

ELKS LODGE INSTITUTED

Clareholm Lodge of Elks got away to a real good start on Wednesday night, when a large class of candidates were given the degree of Elkdom, and the officers installed. In the absence of District Deputy Dr. J. L. Gibson who was unable to attend because of sickness at home, Exalted Ruler Charlie Hixson of Lethbridge Lodge represented Grand Lodge. Staveley Lodge put on the work and did it well. Exalted Ruler Alex Allan was exceptionally good for an officer who was only initiated into the order last July. Elkdom in the south was represented at the meeting. Vulcan coming over with a band and about forty-five members of the "old" lodge, Rev. Mr. Daniels.

After Lunch Miss Jean Gauld delighted the members with a number of dances which were much appreciated. Miss Helen Tillson played the piano accompaniments.

Harold Fairbairn, the Exalted Ruler of Clareholm Lodge, welcomed the Elks to Clareholm and expressed the opinion that the order was a real valuable acquisition to the community and expected that a better social and sporting spirit would result. The order, he thought, would bring the young people of town and district closer together. They would also become better acquainted with the people of other towns.

Exalted Ruler Hixson spoke for Grand Lodge and for Lethbridge. Leading Knight, Pat Harris, of Nanton Lodge was heard from from that quarter. Exalted Ruler Dave Leyden of Graman spoke for that part of the Elk map. Exalted Ruler Alex Allan represented Staveley Lodge. Good old Harry Nelson, Past Exalted Ruler, talked for Vulcan Lodge which was born only a month ago. And for such a young kid, it must be said that Vulcan is sure a robust budy. Dooley Ober led their band and everybody led in the singing.

Harry Hutchinson, Harry Scott, sportin' editor of the Calgary Albertan, was one of the visitors present.

Many of the boys who intended joining the lodge were out hunting in the mountain, so there will be a big class to go in on Thursday, January 7, which will be the first regular meeting.

The officers of Clareholm Lodge are as follows: Past Exalted Ruler, Wm. Lewis; Exalted Ruler, Harold Fairbairn; Esteemed Leading Knight, John Bowie; Esteemed Lecturing Knight, Dr. A. D. MacGregor; Esteemed Loyal Knight, Wm. J. Welker; Secretary, Gran Clark; Treasurer, Geo. McKinney; Esquire, Wm. Keeley; Chaplain, Chas. Stewart; Inside Guard, Henry Shirlips; Tyler, Lloyd Nowlin; Trustees, Carl Milnes, Ed. Gibbie, R. E. Moffatt.

"PRINTEMPS HOUSE,"

Athus, Belgium.

The Alberta and Yukon representative of the above firm will be at Mrs. Lator's store, December 11th and 12th, and will be pleased to show you samples of artistic Belgian hand-made faces.

Cultivate the Christmas Spirit Now

The approach of the Christmas season brings to nearly every body thrill of pleasurable anticipation. It is a time of happiness and goodwill all through when old disappointments, and enmities, and selfishness are relegated to the background. Already people are busy planning and making gifts for relatives and friends, and it is to be hoped, with a thought for those who are less fortunately placed in life than themselves.

But there are certain groups in our population to whom the coming of Christmas means the hardest work and longest hours of labor during the whole year. Chief in this group are the employees of the post office throughout the country. Persons who seldom visit to relatives and friends throughout the year, do so at Christmas time. Millions exchange Christmas cards and other forms of greeting. Presents containing gifts pour into the post offices in their thousands. And the postal employees have to receive, sort and dispatch it all, and in the cities and along rural routes, deliver it.

Most people time the mailing of their cards of greeting and gifts so they will arrive at their destination one or two days before Christmas, or possibly on Christmas Day itself. The inevitable result is such a congestion in the post offices and railway mail cars that it is a physical impossibility to handle all the business within the short space of time before Christmas Day, so that for low tremendous amounts of extra pay, the postal employees are called upon to work for Christmas and are not received by those to whom they are addressed until Christmas is past and gone for another year.

All the more planning, and forethought, and unselfishness in behalf of the post office staff, displayed by people generally, would greatly improve this condition. By mailing Christmas gifts well in advance it may be that they will be needed some days before Christmas, but, even so, it does not a greater strain in the arrival of the first gift than in the case of subsequent ones. And is not a gift received before Christmas a happier one than if it is delayed and not received until Christmas and its festivities are past?

Another group who find the work preceding Christmas a time of strain, resulting in rapid nerves and weak tremors, are the clerks in stores. Many of them after the strenuous pre-Christmas rush find it necessary to reorganize for the best instead of being able to enjoy and join with others in the joy of the day. Their lot can be made much easier by early shopping. Therefore, in our Christmas articles, along a thought in the consumer and shopper.

In order to be in a position to mail your Christmas parcels early, it is necessary to shop early. This both those groups of workers will be helped to give you and the public generally better and more efficient service. Just a word in season—bring your Christmas mailings into action well in advance of Christmas day.

You stand to gain by it in every way. Remember the old saying: "The early bird catches the worm." Well, early shopping means that you have the pick of the goods offered for sale, while the late shopper has to be content with what is left over and previously rejected by the more alert and discriminating shopper. Early shopping gives time for suitable selection of gifts best designed to meet the needs and enter to the tastes of the one for whom they are intended. It means leisure in getting them suitably inscribed with appropriate messages and neatly and properly packed. And an attractively tied or packed parcel adds much to the pleasure of the one who receives it. It conveys an impression of thought and real love on the part of the sender.

Finally, in making the instructions of the post office authorities. Put the postage stamps in the upper right hand corner; the address in the lower right hand corner; place your own name and address as sender in the upper left hand corner; if the parcel contains fragile articles, mark it boldly "Fragile with Care" or "Fragile." If you are attaching any Christmas seals or stamps of greeting, place them on the back of the letter or parcel, but not on the same side with the address and postage stamps.

General observance of these little things will greatly expedite the handling of the Christmas rush of mail matter, insure the proper handling of your present, and by securing the earliest delivery of the letter of the post office employee result in what you yourself desire, the best possible service.

"Phone, mum, the store's gone out."

"No, Nora, you don't mean the store's gone out."

"Indeed I don't."

"Then just call me up the installment men just came out got the range?"

A Massachusetts farmer in 1790 sent only 17 to maintain his family and operate his farm, all other costs.

Since having been found on the farm.

CHILDREN CRY FOR

Fletcher's CASTORIA
MOTHER—Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea, allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

New Types Of Aeroplanes

British Government Has One That Can Be Converted Into A Yacht.

A French engineer, M. de Saint, has invented a new type of aeroplane, which can be driven by ordinary automobile engines.

The plane has no fuselage body. The aircraft, tail and rudder are attached to the front wing by steel rods only, and the pilot and passenger sit in a sort of cockpit in the center of the wing.

Between the two main horizontal engines that are used. The plane is of course much lighter than the usual type, and it is said that it can be stored with fuel enough for a flight of nearly 3,000 miles.

The engines burn only a gallon of gasoline for every thirty miles of flight, and drive the plane easily at a hundred miles an hour.

The British Government has built another experimental aeroplane which has light masts and sails in addition to its aerial equipment.

When it has to come down into water the sails can be spread and the plane converted into a real little yacht.

The plane is an aerial, and a German engineer, Rohrbach by name, is said to have designed it—Yacht's Companion.

Fine for carbur when needed in upon or snuffed up the vapors inflamed.

Head and Chest Colds Relieved In A New Way

A Selve which Releases Medication Vapors when Applied Over Throat and Chest.

Inhaled as a vapor and at the same time absorbed through the skin like a liniment, Vicks VapoRub reaches immediately inflamed, congested air passages. This is the modern direct treatment for all cold troubles that is proving so popular in Canada and the States where over 17 million jars are now being used.

Splendid for sore throat, tonsillitis, tracheitis, croup, head and chest colds, croup, influenza, and fever.

Just rub Vicks over throat and chest and inhale the medicinal vapors. It quickly loosens up a cold.

No Trouble To Make Payment

Danish Sellers Pay \$2,000 On Purchase Price of Farm.

"You want us to make a payment on the farm?"

"Yes, that is the usual way of handling land deals of this kind," said the smiling land agent.

"All right, we'll give you some now," and without any more ado the purchaser reached among the matting and brought out two little wads of paper which he laid on the desk.

This little wad of paper were one hundred dollar bills.

This little scene took place in the office of the Western Colonization Company in Saskatoon. The thought and dollar bills were paid over to two Danish farmers who were brought out to this country to take up land, and who purchased a seven acre tract near Saskatoon. The agent was Hans Frederiksen, a former Danish immigrant.

She Could Hardly Do Her Household Nerves Were So Bad

Mrs. L. M. Parf, Canscon, Ont., writes: "I had been and nerve trouble, and became so short of breath I could hardly do my daily household work, and was so nervous I could not think of staying alone, as every little sound I heard felt like a shock to me."

I Saw

recommended, so I tried a box, and after taking the second one I am now feeling like a different woman."

This preparation has been on the market for over 25 years and has achieved a wonderful reputation for the relief of all heart and nerve troubles.

Put up only by The T. M. Milburn Co., Limited, Toronto, Ont.

Planning To Test Speed Of Light

Approximate Velocity Now Given At 182,000 Miles Per Second.

Further experiments with an object of determining the exact speed of light are to be conducted next summer in California by Professor A. A. Michelson, of the University of Chicago, it is announced by the university.

With perfection and refinement of mechanical devices, this noted physicist hopes to calculate to a figure within five miles per second. The approximate velocity is given at 182,000 miles a second.

Last summer the Chicago physicist measured speed of light by projecting a powerful light through a narrow slit on to a mirror which was spinning at a rate of about 30,000 revolutions a minute.

This mirror, in turn, projected the light on reflecting apparatus at a station about 22 miles distant from Mount Wilson. Next summer, it is planned, tests are to be made between two stations 160 miles apart and with use of larger mirrors.

A practical use for an accurate knowledge of the velocity of light is given as follows: Knowing the velocity, it is perfectly possible to reverse experiments and measure distance in terms of light.

Two points with a difference of less than one part in 1,000,000. This is an accuracy which no engineering instrument maker can ever hope to attain.

Radium Clock Shod Run Indefinitely

Is Nearest Approach to Perpetual Motion Say Scientists

Perpetual motion has been a long sought goal and while many ingenious devices have resulted from efforts along this line, all have failed to prove practicable. But recently there has been invented a device which, while not a timepiece, is called a "clock," which scientists declare should run indefinitely.

This is known as the "radium clock." As its name suggests, the motive force of the radium clock is atomic energy.

There is no poisonous ingredient in Holloway's Corn Remover, and it can be used without danger or injury.

Got Radium Instead Of Radio Parts

Woman Accepted \$25,000 Package That Was Her Own

Fifty thousand dollars worth of radium went astray because the King's County Hospital, New York, hired a new ambulance driver just when Mrs. Charles L. Feldman, of Brooklyn, expected a package of radium from the hospital.

The similarity of the name of the radio and radium caused the trouble.

Behind Mrs. Feldman's house is the home and radium hospital of Dr. Chester Ford Duryea.

Dr. Duryea has used his radium at the hospital and was to be returned to his home to custom under guard in an ambulance.

The new driver supposed Dr. Duryea had sent just about to his new hospital and left the package there.

When Dr. Duryea arrived home he called the hospital and was told the radium was delivered.

Six hours later, the driver of duty, was found and explained Mrs. Feldman had taken the package from the hospital, believing it contained radium parts. She had not opened it.

Nation-wide Fame—There is scarcely a corner of this great Dominion where the name of Dr. Thomas' Electric Oil has not been tried and proved. It is one of the world's most recent remedies for sore throat, lame back and many other ailments arising from inflammation.

Rubbed on the skin its healing power is readily absorbed, and it can also be taken internally.

Report Good Sockery Run

Reports received by the department of Marine and Fisheries are to the effect that a good run of sockeye salmon occurred last year for the first time since 1909, in the Stuart Lake district at the headwaters of the Fraser River, B.C.

The advance of sockery at this time, important spawning area of the river during the past 16 years is due, according to the department, to the rock slide which occurred in the Clear Lake Canon in the lower Fraser in 1913. This slide completely blocked the river to the ascent of salmon.

Radio Plays A Great Part In Keeping The Western Farmer In Touch With World At Large

The popularity achieved by radio in Canada is as great as it is to be found in any other country and greater than in most. The general adoption and rapid expansion are but further indications of Canada's position in the forefront with those countries developing along modern lines, and boding invention to national progress. Radio has unquestionably swept over the country, engulfing all sections of the population and entering most intimately into the country's commercial, business and social life. In its peculiar relation to certain phases of Canadian life radio would seem to have imparted greater benefits than elsewhere.

Radio licenses were issued by the department of marine and fisheries during the twelve months ending March, 1925, to 91,950 persons. Ontario led all provinces with a total of 15,147, followed by Quebec with 13,151. Registrations in other provinces were: Saskatchewan, 9,303; Manitoba, 6,543; British Columbia, 6,490; Alberta, 5,842; Nova Scotia, 2,772; New Brunswick, 1,240; Prince Edward Island, 1,231; Yukon and Northwest Territories 17. Licensed broadcast stations in the Dominion numbered at the end of the year.

The number of licenses issued in the marine province is striking, according to the sales manager of a trading company, the west is Canada's best radio field, and prairie farmers buy more sets than any other class of people. Radio is playing a great part in the life of the Western Canadian farmer and he is finding increasing benefits in it every day. Constantly in touch with the big centres of the continent, he has instantaneously become the market reporter and the diversions of cities can be brought at will to his isolated home. In the war and immediate post-war years the general adoption of the automobile in Western Canada did a great deal to revolutionize the life of the Western Canadian farmer, and now the same progress of the radio has further lessened any disadvantage he may be expected to sustain by reason of his position and isolated something unique and popularly enjoyed in the way of news and farming.

Cattle Plague Is Spreading In England

Famous Warminster Fair Cancelled For First Time In 400 Years
The Prince of Wales may have to abandon his fox hunting this season owing to the spread of foot and mouth disease and public interest in the epidemic, which is affecting 15 counties, centres on this feature.

Hunting is not allowed in the affected areas because it is believed that horses and dogs crossing over pastures carry the infection with them. Officials of the ministry of agriculture are investigating a theory that automobiles are also carriers of the disease. They believe that mud-covered automobiles which spread the cattle scourge, especially manure, arriving from the continent, where the disease is prevalent.

Several cattle shows have been abandoned, including the famous Warminster fair in Wiltshire, which has been held each year without interruption for 400 years.

Advertising Creates Demand For Fish

Publicity Campaign of Last Few Years Produces Results
"If every Nova Scotia fishing boat and every Nova Scotia fisherman were to work the full limit of their capacity for the next six months they would be unable to supply the demand that had been created as a result of the intensive newspaper advertising campaign that has been carried on by the fishing industry," declared Arthur Boulthill, president of the Canadian Fishermen's Association, addressing the Rotary Club on "National Fish Day." Mr. Boulthill gave the fish a brief history of the advertising campaign started some years ago by the fishing industry of Canada, and which, he said, had created an unprecedented demand for fish food in Canada.

Obliging Prison Governor (to released convict—"Tim" Curry?) I find we have kept you here a week too long!"

Curry—"That's all right. Run it off next time."

Student—"They hanged her in China."

Teacher—"Shanghai!"

Student—"Not very."

W. N. C. 1600

Was Elected President

E. Garrett, of The Signal, Watrous, Sask., who was elected President of the Saskatchewan Division of the Canadian Weekly Newspaper Association at the recent convention held in Regina.

From Farm To City

Luxury Costs Are Double For Urban Dwellers

"To a little figuring before leaving the old homestead for the city," is the advice of a university professor who has made a study of rural economies. In his investigations he found that a farmer who proposes moving to town must assure himself of an income twice as big as he had on the farm if he expects to live as comfortably as he has been accustomed to. He discovered that 200 average farmers had an income of \$1,600 a year. To live as well in the city they must have \$2,500—Vancouver Province.

Quick Thinking Saved His Life

Robert Keatinge, agent, of Jersey City, N.J., grabbed the bumper of a speeding car which was about to run him down, stuck his foot onto the front axle and was carried three blocks before he could attract the driver's attention. The lad received only slight bruises.

Saskatchewan C. W. N. A. Meet

Good Attendance at Ninth Annual Convention in Regina

The Ninth Annual Convention of the Saskatchewan Division of the Canadian Weekly Newspaper Association was held at Regina, on Thursday and Friday, Nov. 5 and 6, and was an unqualified success. A large representation of members attended from every corner of the province, and the business sessions proved most helpful. The delegates received an official welcome from Mayor Mason, who handed over the keys of the city. The Saskatchewan Co-operative Wheat Producers gave a luncheon at noon on Thursday, and in the evening the delegates were entertained at a dinner. The delegates attended a theatre party as the guests of the Toronto Type Foundry Co. On Friday at noon the Saskatchewan Co-operative Elevator Company entertained at a luncheon, and in the evening the Weekly Newspaper Association gave a banquet, having among their guests Premier Dundas, Hon. S. J. Lett, Mayor Mason and other prominent citizens of the city and province.

At the closing session on Friday, officers for the ensuing year were elected as follows: Hon. S. J. Lett, Prairie News, Gowan, honorary president; E. Garrett, Signal, Watrous, president; W. G. Redmond, News, Maple Creek, vice-president; S. J. Lett, Despatch, Alameda, secretary; treasurer, James McDonald, Courier, Calgary; was elected honorary vice-president. The following executives were elected: C. R. McIntosh, News, North Battleford; S. J. Dorman, Despatch, Alameda; T. S. McCullough, Review, Weyburn; T. E. Seiver, News, Waskesee; C. H. Ash, Gazette, High Hills; and E. N. Carter, Press, Wilkie.

Electing Huge Radio Station

A giant broadcasting station is being built at Ruby. The 42 plant units will be one and a half miles long and a half-mile wide.

Artificial fibre silk is transparent to ultra violet rays of the sunlight and for this reason it is considered better than silk or wool.

No Need Of Exaggeration Or Misrepresentation To Attract British Settlers To Canada

Poultry Shows

Two Dressed Poultry Shows to be Held at Saskatoon and Regina

Saskatchewan is putting on two dressed poultry shows, one at Saskatoon, December 2, and one at Regina, December 3.

Excellent prizes are offered and the feature of the two shows will be that a special car will be in waiting at Saskatoon, December 2, and immediately the show is over the birds will be loaded into the car, which will proceed to Regina, arriving there just as the Regina show is concluded, pick up their birds and at once proceed to Montreal, where already certain firms have arranged to feature "Saskatchewan exhibition poultry" for the Christmas trade. It is expected that the total number of birds will be about 2,500 birds in the car. Three years ago, when the dressed poultry show was started at Saskatoon, one show case, six feet long, contained all the birds offered for exhibition.

Professor Blair, of the university, and W. Waldron, of the department of agriculture, Regina, have the grading, packing and shipping of the car in charge.

British Channel Trader Speedy

For speed among the trading vessels of the world pride of place must be given to a British Channel trader, the S.S. Porthcawl, which has recently plied the journey from Fremantle, Australia, to Swansea in the record time for a trader of 27 days' steaming time, at an average of 18 knots per hour.

Turkey Buzzards In B.C.

Bird lovers at Victoria, B.C., have been worried by the appearance over the city of between 150 and 200 turkey buzzards. Many say they have their homes in the southern states and are seldom seen so far north, especially in such numbers. Naturalists are at a loss to explain their presence here.

A party of British newspaper correspondents and editorial writers recently visited Canada as guests of the president of the Canadian Pacific Railway, and have now returned to the British Isles refreshed with a volume of impressions gathered in the course of a most complete and exhaustive investigation of Canadian life.

The members of the group were especially appointed by the most important and influential of the journals of the British Isles and are all experienced, hard-working, and conscientious journalists with the facilities of observation and analysis acutely developed. The papers they represent in a very adequate manner cover in the United Kingdom. Their arduous literary toils have now been rewarded by the opportunity to penetrate into all the channels of Canadian activity.

The party was given an unique chance to briefly but adequately observe Canada at work and play and to see up to the total of the life of the country, and to estimate its opportunities and possibilities. Men of the calibre of these journalists, trained in the widest and most varied of fields, are to make the most of such a visit. The people of the British Isles should welcome their impressions and Canada should maturely benefit from the results of their dissemination.

Along certain lines Canada has of late been making a reputation for itself from publicity of an adverse nature based on the unfortunate experience of a few Britishers who from one reason or another have proved unsimilable. There has been too great a tendency to generalize from these cases, and to make them representative of the whole of Canada. It is to be hoped that the reports of these journalists, who are so far north, especially in such numbers. Naturalists are at a loss to explain their presence here.

The British Isles is in constant and urgent need of information on Canada which its people can feel assured is authentic and free from bias. It should be to state what met by the work of those newspaper writers through years of close contact with Canada, accurately and clearly, and given peculiar opportunity to see into the workings of Canadian life. Canada has not the slightest apprehension over the conclusions they reached. It cannot be too strongly or too frequently reiterated that Canada has the slightest need of exaggeration or misrepresentation. All the kindly desire to assure her own future development is to be adequately known as she really is.

Many Entries For Dairy Show

All-Canada Competition Takes Place in Winnipeg This Year

The all-Canada dairy show which will take place in Winnipeg, February 2-12, in connection with the Western Canada Dairy Convention, is already attracting entries from provinces all over the Dominion. Out of a total of 64 already received, Alberta has 25, Manitoba 14, Saskatchewan 5, British Columbia 5, Nova Scotia 2, Prince Edward Island 1 and Ontario 1. The all-Canada convention was first instituted by the Manitoba Dairy Association and is now held in a different city each year. The forthcoming event will take place under the auspices of the Manitoba Dairy Association and the Dairy Manufacturers' Association.

Britain's Egg Import Bill

Last Year Amount Rose Over Seventy-seven Million Dollars

The London Daily Mail is carrying on a campaign to reduce the British egg import bill. Last year the bill for eggs imported into Britain was approximately \$77,500,000. This year imports represent 2,500,000 cases.

During the last few years there has been a notable increase in the number of laying hens kept in Great Britain as well as a marked improvement in their productive powers.

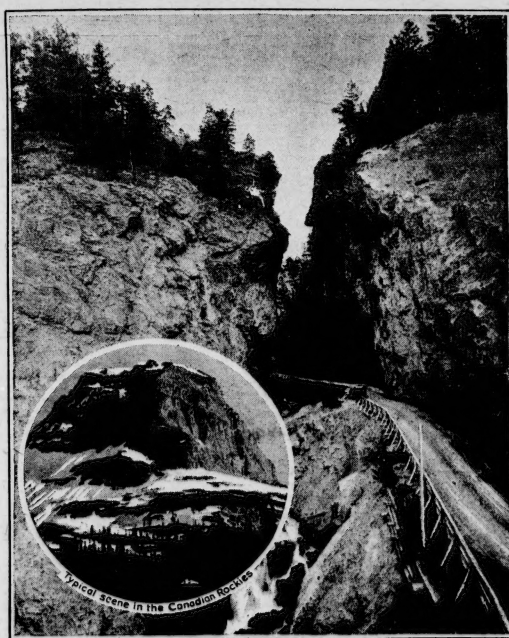

Millions of Canadian eggs go to Britain every year, and are likely to be in demand there for many years to come.

U.S. Chicken Population

The chicken population of the United States is placed at 400,000,000, according to a recent census. The number, the department said, would make a procession of chickens 100 miles long and they could lay enough eggs each year to reach from the earth to the moon and back again.

Not everything begins in the garden. There's the harvesting habit.

Pierce Rockies With Fine Roads

Typical scene in the Canadian Rockies

Colonel Phil Moore, former station quartermaster at Edmonton, and now enthusiastic admirer and frequent visitor of the Canadian Pacific Railway, claims that there is no mountain scenery either in Colorado, Yellowstone Park, the Yosemite Valley to compare with what the Canadian Rockies have to offer.

He adds that the building of roads through these mountains and the resultant automobile traffic is a factor greatly aiding the development of the Rockies scenery. The highway campaign, he claims, is being carried on by the Canadian Pacific Railway, and is along the roads are nothing places of Switzerland in one.

The season just passed has been the busiest in the history of the Rockies and the resulting revenue to Canada has been estimated at \$90,000,000.

The percentage of American visitors has been from 65 to 75 per cent. Mr. Keatinge and his associates have been increasing in numbers and are looking for a good deal more business. The highway campaign, he claims, is being carried on by the Canadian Pacific Railway, and is along the roads are nothing places of Switzerland in one.

New Varieties Of Wheat

Two Have Been Tested At University of Alberta

The University of Alberta has been giving special attention to the new varieties of wheat which it is thought will meet the requirements of certain districts better than Marquis.

Renfrew wheat is later and higher yielding than Marquis and will likely be suited to southern areas of the province where there is a limited rainfall. It does not seem advisable to sow it in the Edmonton district or in northern areas when frost has to be reckoned with.

Another variety, University No. 225, is entirely headless and resembles Red Bobs from which it was selected. It is about four days earlier than Marquis and in tests on the University farm at Edmonton has given better yields. The shortness of the straw is a disadvantage in the driver area.

Drops Coarse Grain Pool

Alberta Board of Directors Decide Against Project For Last Year

The Alberta Wheat Pool will not operate a pool for coarse grains this year. At a meeting of the board of directors of the pool held in Calgary, it was decided that the number of contracts received in response to the inquiry sent out by the board was not sufficient to warrant organization for the present season at least.

Accordingly all contracts signed by those wishing to have a coarse grain pool have been declared void and official notification of the board's decision will be sent to every farmer who signed a contract under the provisional terms of the proposed pool.

Canned Goods From Coast Province

The Occidental Fruit Company is shipping from Kelowna on an average two cars of canned goods daily to the coast, as well as four cars of fruit and vegetables, and the latter including export shipments of apples to New Zealand.

And in Japan, bread is bought by the yard. And maybe they say is inches is better than none.

Give Santa Claus a Holiday

There is no business that enters more intimately into the lives, business and private, of the Canadian people, than the postal service.

The postal service is, in fact, the children's Santa Claus at Christmas and the grown-ups' Santa Claus all the year round.

This reference to the postal service as a Santa Claus has a particular significance at the present time. We are at the threshold of another Christmas and in our festive activity to prepare for the holiday season, we are too apt to forget the postal employees who are doing their utmost to see that your Christmas is glorified by the good wishes and remembrances of absent friends. Truly the postal workers are acting as your Santa Claus and in doing so their own enjoyment of the holiday is largely lost, in that instead of spending this "day of days" with their families, they must work harder than usual to deliver the vast load of Christmas mail which has piled into the post office at the last minute.

You can make Christmas day a holiday for the "all year round" Santa Claus by obeying that old repeated slogan, "shop early—mail early." A few days earlier in mailing means no Christmas day rush, no tie up of mails, but instead a real "clean-up" by Christmas eve and a regular holiday for the postal service. You the mailing public have in your hands the ganting of this favor.

Let your Christmas spirit make itself in a practical way by getting those cards and Christmas presents off earlier than usual. Mark them "Do not open until Christmas" if you wish, but by all means mail early and give the postal workers a Christmas at home.

Chas. Murphy,
Postmaster General

Red Cross

"To tag day off for the Canadian Red Cross, Alberta Division, on Saturday 5th December, was more than usually successful, a total sum of \$96.56 being collected. Instead of the usual tag artificial flowers made by patients in the Junior Red Cross Hospital were used and these proved exceedingly popular, being in the form of pink rosebuds.

The thanks of the local committee are here rendered to the following Girl Guides and Boy Scouts who generously gave their time to the tagging: Kitty Gye, Freda Foster, Margaret McMillan, Winnie Hartwell, Muriel Goulet, Cecile Baur, Ellen Duckett and Nellie Wallis, and Scouts Cyril MacKenzie, and Atkin son, Glen Moffatt and Duncan MacKenzie.

Jas. McKinley, Pres.
J. R. Watt, Sec.-Treas.

Santa Approves a Christmas Gift

Santa Claus has been down a great many chimneys since he started business, and he is intimately acquainted with a large number of people. He knows that the best kind of gift is one which pleases the whole family, an bring the excitement and enjoyment of Christmas eve. That is why he looks so jolly when he receives hundreds of subscriptions to The Youth's Companion with which to fill his pack. And being wise from long experience, he knows that people are likely to overlook gifts around Christmas, so he chuckles when he sticks a Companion into the top of a stocking. "Be as greedy as you like," he thinks, "the more the better for you."

The 52 issues of The Youth's Companion for 1920 will be crowded with serial stories, short stories, editorials, poetry, facts, and fun. Just send your order to the address below and Santa will take care of delivering the paper to your home or to the home of a friend. Subscribers will receive:

1. The Youth's Companion—52 issues in 1920, and
 2. The remaining issues of 1925.
- All for only \$2.

3. Or include McCall's Magazine, the monthly authority on

fashions. Both publications, only \$2.50.

Here and There

Wishing farewell and bon voyage to the celebrated writer of the Scarlet Pimpernel, a bouquet of scarlet pimpernels was presented to Baron de Orcy, when he embarked with her husband Mr. Montagu Barrow, on the SS. Montclair of the Canadian Pacific line, for England. The presentation was made on behalf of the company by Capt. Geo. Webster and President E. W. Beatty's card was attached. Baroness Orcy came out to Canada to assist in local colour for a new book, which will be eagerly awaited here.

Motor tourists from the United States brought \$150,000,000 in revenue to Canada in 1925, according to estimates of government officials. This sum is equal to a quarter of the value of the dominant wheat crop and approximates the value of the annual mining output of Ontario, Quebec and British Columbia combined. More than 2,000,000 American automobiles, it is estimated, have crossed into Canada this fall. About as many of the automobiles of 9,000,000 persons or a number equal to the total population of Canada.

C. B. Foster, passenger traffic manager of the Canadian Pacific, states that the volume of the crop in the West this year will make money more free and is bound to correct in large passenger vessels, to ensure prompt and regular delivery. To handle the expected increased volume of traffic, his company, he states, will run special trains early in December connecting directly with the company's Atlantic lines, sailing from the winter port of St. John, N.B. These liners sail on dates that are calculated to get the foreigner home to any point in the British Isles or the near continent in plenty of time for Christmas.

Taking the North American mouse over to Europe with a view to acclimating it in Northern Europe, the Count Schimmelmann, one of the largest land owners in Denmark. The Count and Countess were taken to the Gains river district, where they spent three weeks. During this time they walked an average of fifteen miles a day for twenty days, covering three hundred miles on foot, not reckoning the distance they traversed in canoe. They went to the woods of Northern Quebec for another shot at the elusive mouse before sailing for home on the Canadian Pacific liner Montclair.

A recent epidemic of motor accidents, five of which occurred in one day, and which, in one case, proved to be fatal, elicited the following editorial comment from the Montreal Star: "That five drivers of automobiles should drive their cars into moving trains within a period of twenty-four hours in Canada would seem to indicate carelessness is the main cause of accidents. The location of level crossings is either well-known or clearly indicated at a distance that gives even a fast driver ample time to stop. At many such crossings bells automatically ring as trains are approaching. At others, hand gates are let down. Some are open—these almost entirely in the country districts. But despite all safeguards, warnings, signals, and precautions, accidents continue to happen at level crossings with an alarming constancy. In some instances, indeed, it almost looks as though the drivers were determined to defy all attempts to ensure caution."

The paper calls for cancellation of the railway license in cases like the above.

Canadian Products Arriving at Southampton

As can be seen from the photographs reproduced on the improvements adopted by the port authorities in the transporting of goods from ships' side to shed by means of electrically driven about trucks, which results in a great saving of time and labor, and also reduces the amount of handling to which the goods are subjected, and so minimizes the risk of damage.

The system of road transport from Southampton Docks is also well organized, so that local consignees are excellently served, whilst the railway connections to London and the North of England are such that to quote only one example, it is possible for goods to be put on rail in the west of Canada or the United States, shipped across the Atlantic to Southampton, and be on sale in London inside 10 days. Besides boxes and flour, which are shown in our illustrations being unloaded from the Canadian Pacific liner 'Empress of France', bacon is another commodity playing an important part in the rapidly growing import trade of the port.

Ready to Roll the World's Grain Caravan

To the average person a railroad ship is perhaps the most interesting institution one could possibly think of. It suggests to one's mind everything that is cold and inanimate—dry—grim. Even the most interesting institution one could possibly think of. It suggests to one's mind everything that is cold and inanimate—dry—grim. Even the most interesting institution one could possibly think of.

Weston Shops cover 23 acres of land, fenced in and guarded at entrance by an attendant. Inside the fence is a separate railroad yard containing 40 miles of trackage. One thousand cars are being shifted from the rock-aid the Rockies there is an engine that will enter the form of a train. All cars are made of steel and every thing is re-made, boiler and every thing.

Passenger and freight car wheels are made here and are also made here. The wheels must be ground while the form is explained one wheel is an eighth of an inch larger than the one on the other side of the axle, that larger wheel will want to travel an eighth of an inch farther every time the other one turns over, thus wearing down the flange and spoiling the track—and causing danger to the entire train. Annually, 16,000 wheels are made here.

A unique part of the shops is a section where all the scrap iron and metal waste from Fort William to Calgary is gathered and shipped in a large incinerator. The waste from the shops was \$15,000 a year from here.

Under the management of J. H. Bowen, there are 815 men working on the world's grain caravan.

Great War Was Inevitable

Could Not Be Averted Says Lord Grey

Gradually new light is being thrown on the events of the 1930s. Circumstances that rendered the Great War inevitable, and on the efforts of the United States to shoulder the burden of a world that had been left almost ruined by the ravages of the gathering storm, and the desperate struggle of the statesmen of the United States to avert the disaster, has been made more and more known. A book recently published by the University of California Press, *The Fall of the House of Habsburg*, by the late Dr. John W. H. Murray, is a study of the events that led to the outbreak of the war. Though he does not deal with the preliminary battles against an all-powerful destiny, in the sense that the author of *The Fall of the House of Habsburg* does, he does deal with the debates that surrounded the question: Could the war have been avoided? His thesis is that the war was inevitable, and that the knowledge of the internal situation in Europe as new living man possesses, was not available to the statesmen of that time. At least, credit him with doing all that a humanly speaking, could be done with the knowledge of the internal situation at a time of whirling and bewildering storm and stress to avert the great disaster.

**Hungarian Asks
Exchange Of Stamps**

**Boy Scout Sends Fifty-five and Wants
Canadian Ones**

The International Bureau of Boy Scouts' policy of communication between boys of the different nations has brought to Regina Scout headquarters a strange letter in a foreign language, the only English words

Inside were 55 postage stamps and two scraps of paper with a message

which defied all attempts at pronunciation. The epistle "was given in charge of an Interpreter, who gave the translation thus: "To whom it may concern, I am sending you postal stamps (postmark) for your pleasure, have exchanged for others." The address proved to be "Somogyi-meghe" Kizalait ulat 45, Kaposvár, Magyarország, Hungary, Europe. It was the south-east "Fozo" Kosmaro." The letter took the money to arrive and was covered with postage stamps, whose denomination was 1,000 and 2,000 Korona, the total cost being 15,000 Korona.

eries reports the collection of 10,500,000 sockeye salmon eggs by the Pam-
berlon hatchery on the Skeena River.

British Columbia. This collection exceeds the largest collection made in any previous year by more than 18,000,000 eggs. The egg collecting operations in other parts of the province are far from being completed, but they show a total collection to date of more than 65,000,000. In Lake Winipeg 75,900,000 whitefish eggs have been collected for the hatchery at Gull Harbor, and reports from other sections indicate a satisfactory season. The Pemberton and Gull Harbor establishments are the only ones at which the egg collecting operations

at have been finished.

Artificial Waterfall Higher Than Niagara

Will Supply Electrical Power For All
Trains in Switzerland

An artificial Niagara, in the Alps, at an altitude of more than 6,000 ft., was recently completed when the barrage of the River Barberine, in the Canton of Valais, was opened with great ceremony by the Swiss authorities. The waterfall is actually higher than the

(c) Niagara Falls. The cost of the enterprise is nearly £2,500,000, but the

outlay will be recovered within a few years, as the electrical power supplied by the dam will be amply sufficient to drive all the trains in Switzerland, and they will be consequently independent of foreign coal.

Why People Take Cold

Causes for colds, attributed to hundreds of different atmospheric and physical disturbances, is chiefly due to over-fatigue and stale air, according to a bulletin issued by the United States public health service. The majority of colds are "caught" during the months when little outdoor exercise is taken.

Celebrities On Air
The voices of famous men and women, both living and dead, will be

broadcast in England, through an arrangement between British Museum and British Broadcasting Company. The notes will be taken from a speech

The voices will be taken from phone graph records taken years ago.

WORLD HAPPENINGS
BRIEFLY TOLD

Reports being prepared by J. D. Roper on Canadian expeditions to the Arctic, will be complete in 1928.

Rev. John Carter, 64 years of age, of John Carter, Toronto, has been elected mayor of Oxford.

H. J. Rowan, meteorologist of Washington, D.C., predicts 1928 will be a year without a summer with agriculture almost impossible.

The new Canadian Red Cross Hospital was formally opened at Lethbridge, Ont., by Hon. Lincoln Goldie, provincial secretary.

More than 400,000 people travelled by water between Canada and the United States during the year ending June 30th, research bureau shipping board records reveal.

A memorial tablet to the late Sir William Price was unveiled at the Armistice memorial service held in St. James' Anglican Church at Kenosha, Nov. 8.

With the 1925 season of navigation nearing an end, statistics compiled at the port of Quebec show that 78,287 passengers were landed up to the end of the season for Canada and the United States.

Sir Horace Bunsell, British ambassador to Madrid, will head the commission of the League of Nations which will inquire into the reasons for the fighting between the Bulgars and the Greeks recently.

The Manitoba Power Company will spend \$2,000,000 in new equipment and transmission lines to develop successful projects for supply of power to the Manitoba Pulp and Paper Company mills at Port Alexander.

The "death ray" known as the "death ray" has been shown to have no effect on the human body. It is a "stationary" energy capable of controlling and producing its own, self-maintained power. It has a "perfect" model of demonstration.

After working on his invention for thirty years, John Smith, engineer of Winnipeg, claims to have perfected a "stationary" energy capable of controlling and producing its own, self-maintained power. It has a "perfect" model of demonstration.

Vice-Admiral Sir Roger Keyes, commander-in-chief of the British Mediterranean fleet, was slightly injured when an aeroplane in which he was riding crashed into the sea. The pilot and another officer in the plane suffered slight cuts and bruises.

Big Slump In Shipbuilding

Industry Suffers Most Decided Drop Since Great War

Shipbuilding throughout the world suffered its most decided slump since the war during the last summer, the department of commerce announced recently.

Reports for the third quarter of 1925, ended Sept. 30, received from Lloyd's Register, showed a drop of more than 150,000 tons.

Motor vessels declined 40,000 tons during this period, construction of other classes of ships, it was stated, has been decreasing steadily.

Construction in this country dropped 22,000 tons, while the decrease in Great Britain and Ireland was reported to be \$4,000,000. The largest decrease was reported from Germany with a 100,000-ton drop. France declined 39,000 tons and Denmark 7,000 tons.

Italy and Holland showed the only increases in work started during this period.

May Be Important Discovery

Cancer Scourge Is Cured By Lead Sulfate

Liverpool Professor

Selecting a meeting place for the Royal Academy of Medicine for an announcement of world-wide interest to the medical profession and victims of cancer, Prof. W. Blair Thompson, of Liverpool University, and honorary director of the Liverpool Cancer Research Institute, told leading physicians at Liverpool that, while testing the effects of lead sulfate on the city of the successful treatment of the dread disease by the chemical agent, lead. He offered several instances in which remarkable cures had been achieved, and assured the members of the academy that 50 or so patients were believed to be cured of about 200—mostly hopeless cases—treated.

Many Savings Accounts

Over 191,216 savings accounts in Hawaii banks during the past year, totaling \$2,708,371.75. Anglo-Saxon companies registered the highest total, while savings deposits by Japanese increased more than \$1,000,000 over the previous year.

Remember there is a limit to human endurance. The friend who stands up for you may be in the course of time and all down.

Wide Phone Service

Long Distance Service in Alberta Has Been Made Continent-Wide

With due ceremony, the inauguration of the continent-wide telephone service from Alberta was celebrated recently, when Governor Duff of Alberta converted over the long distance telephone with state officials. In the states of Montana, Colorado and Arizona, and with Chief Justice Anglin at Ottawa, Ontario. The inauguration of this service, by which Alberta telephone subscribers will be able to converse with any point in the United States and with many points in Eastern and Western Canada and on the coast, was made possible through the co-operation of the Mountain States Telephone Company with the Alberta Government Telephones. Repeaters have been installed at Lethbridge, Calgary and Medicine Hat, and copper circuits set up over Lethbridge to the boundary of Montana, linking up with copper circuit extended north from Shelby, Montana. This has made possible the connection with the transcontinental system in the States.

In connection with the historical step taken by the Alberta Government Telephones, it is interesting to note that long distance service in the province has grown from 1,000,000 to 2,000,000 calls in the past ten years, and that in that time the revenue from long distance service has grown from \$100,000 to \$1,000,000 per annum.

The first commercial call over the new international system was given from Edmonton, which a resident of Edmonton conversed with a friend in Minneapolis, Minnesota.

Advance in Medical Science

Toronto Doctor Announces New Serum

Will Cure High Blood Pressure

A serum which may reduce the morbidity of high blood pressure was described by Dr. F. H. G. Starr, of the University of Toronto, at an address before the fifth annual congress of the American College of Surgeons, Philadelphia.

Dr. Starr said that William J. McDonald had been working on the serum in the research laboratories of the University of Toronto for some time, but that it had not yet reached a point to permit a detailed description or an optimistic statement of its probable efficacy. He said the serum was a liver extract. High blood pressure, he explained, usually was due to hardening of the arteries, which is induced by an inflammation, possibly of germ origin.

Dr. Starr said that William J. A Western Editor M.P.

Camron R. McIntosh, D.B.A., Liberal member for North Battleford, is the only editor which Western Canada is sending to Ottawa.

Mr. McIntosh publishes three weekly newspapers, The North Battleford News, The Battleford Herald and the St. Walburg Times. Mr. McIntosh has been an active member of the Saskatchewan Press Association since it was first formed, and on the executive and editorial staff.

He has a long record of service as a newspaper editor, and has been a member of the Canadian Newspaper Association since 1924 and was honored in 1925. He has been a member of the Canadian Club since 1924 and was honored in 1925. He has been a member of the Canadian Club since 1924 and was honored in 1925.

Surgeons Revert To Old Practice

Doctors at Johns Hopkins College Tell New Injections Purely Bland

Modern surgeons have partially reverted to practice of the Dark Ages, when blood letting and leeches were considered the most efficacious of remedies.

The medical wizards of those ages believed the blood stream carried all diseases. When a man in those days had a fever, a cold, or affliction of any sort, a "chirurgian" was called in and his patient was at once bled.

But, although modern medicine has returned in part to this practice it has learned also that the blood stream can be purified with powerful injections—known as diphthericins.

All this was brought out by Dr. Hugh M. Young, of Johns Hopkins Medical College, in explaining the work undertaken by the American College of Surgeons in the formation of a committee on antiseptics, of which Dr. Young is chairman, to gather material for a vast symposium on modern antiseptic surgery.

This work is undertaken as a memorial to Lister, the hundredth anniversary of whose birth will be celebrated April 15, 1927. Lister, who first put forward his theory of the germ origin of infection, by his antiseptic discoveries, laid the foundation for modern surgery.

Keep Tenth Commandment

One Reason Why Canada And U. S. Live Peaceably

Canadian officials have issued figures on the automobile industry in the United States during the past summer, stating that 2,000,000 automobiles crossed the line, carrying 9,000,000 travellers.

The astonishing fact is that these 9,000,000 travellers, chiefly from "the States," equal the number the total population of Canada.

That is, notwithstanding the fact that the United States population is about 100,000,000, the number of travellers from the States to Canada is about 100,000,000.

The visitors spoke the same language, ate the same food, wore the same clothes, and the same currency was accepted without question. A common language has much to do with the ease with which travellers are understood.

The chief reason for this freedom of travel is that Canada and the United States are free from Anglo rivalry. Politically, Canada and America, being the Tenth Commandment.

If European countries would not "covet thy neighbour's goods" many nations would be free to go broke.—San Francisco Bulletin.

High Standard of Living

Conditions of Living in United States Highest in History Says Hoover

Material conditions of living for the people of the United States during the last year have been the "highest in all history," Secretary of Commerce Hoover declared in an annual review made public as part of the annual report of the commerce department.

Factors listed by the secretary as contributing to this condition included a practically complete absence of war, high wages, high prices, a railroad expansion, an equitable balance of prices as among the greater producing groups of the population, and a general return to stable currencies and normal business conditions among the nations abroad.

Novelty in Radio Reception

According to recent reports, the city of Rome offers the newest novelty in London, that is, the "radio" in the old radio listening stations.

For the equivalent of one penny, a pair of phones are placed on the head of the listener and he is allowed to hear one selection. There is but one master receiver, and many sets of phones, but the listener must be content with whatever the operator tunes in.

Broadcasting Duck Calls

Oakland, Calif.—A device for broadcasting duck calls has been invented by J. V. O'Hara, president of the Valley Duck Club. Radio apparatus has been installed in the club's preserves, and with the opening of the shooting season in October, an alluring "quack, quack" was scattered among the duck blinds.

A giant salamander may live to be more than a half century old.

A denaturation of water for the photographic recording of heart sounds, which is expected eventually to save thousands of lives annually, by making possible improved methods of diagnosing heart diseases, has been given by the Columbia Phonograph Company, New York. It is possible to record sounds which ordinarily are so faint as to escape detection by the human ear.

A giant salamander may live to be more than a half century old.

SHEET METAL ARTICLES FOR INDOORS, TOO

While our main work is on the roof, gutters, leaders, and on doors, we are prepared to serve you in the making of flour and sugar bins, bread boxes, drip pans, smoke canopies, etc. We make them right because they will be made to order.

Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost; nor is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment — just as plate glass windows are. Advertising sells our goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

Bethel United Church

"Our Church's Task" will be the pastor's theme at the morning service next Sunday, December 13. This will be a sequel to the theme of last Sunday morning.

In the evening at 7:30 the pastor's subject will be "A Good Steward for Jesus Christ."

Always welcome is always extended to all at the services of this church.

The regular mid-week service will be held on Wednesday evening at 8 o'clock, in the lecture room. Bible studies in First Corinthians will be continued next Wednesday evening. You will be welcome.

The annual Sunday school Christmas entertainment and tree will be held on the evening of Wednesday, December 23, at 8 o'clock.

Sunday, December 20 will be a special Sunday at Bethel church.

Dr. A. M. Scott of Calgary will be the special speaker, and the services of the day will be in the special interests of the United Church maintenance and extension campaign.

Nazarene Church Announcements
Young People's meeting, Friday night, 8 p.m., Vol. Barker and Lieut. Constance Little, both Salvation Army officers from Macleod, will take charge of the meeting.

Prayer band and healing meeting Saturday, 8:30 p.m.

Sunday, 10:30 a.m., holiness meeting. Subject, "A Good Soldier." 3 p.m., meeting in Greenbank school.

Sunday night, 7:15, a great evangelistic meeting. Rev. J. W. Bruce will be the speaker. There is a possibility that the Lord will see it to use this good man of God for a week special meetings, next week. If He leads that way it will be announced Sunday night.

Four Square Gospel

The opening services of our new church passed off very successfully, with record crowds in attendance. The revival meetings are now in full swing every night at 8 o'clock.

Sunday December 13th
11 a.m. Worship

3 p.m. The sword of the Almighty.

7:30 p.m. The drama of life in three acts.

Every week night at 8 o'clock. Come and hear the old fashioned gospel without fear or favor. Full gospel themes, clearly expounded. Divine healing for the body. Why be afflicted, when the Lord Jesus Christ can and will heal you today. Bring your sick friends. Jesus will heal them. Come every soul, by sin oppressed.

There's mercy with the Lord. And He will surely give you rest. By trusting in His word.
